

# GO GREEN<sup>🌿</sup>

## with ReCharge Wellness

*Offering the purest and most comfortable  
**organic** mattresses and pillows available.*

Made from 100% natural organic latex, organic wool and organic cotton, our mattresses are the world's healthiest beds allowing you to sleep better, breathe better and feel better.

Many chemicals used in conventional mattress manufacturing today are highly toxic and have proven negative effects on health. Research has shown that all of these chemicals wind up in our bodies after eight hours of breathing and full-body contact. With our chemical free mattresses, you can rest easy.

For superior comfort, our organic mattresses are completely customizable so you can get the exact level of firmness that fits your body and sleeping habits. And because there are no steel coils or springs, you never have to worry about tossing and turning due to pressure points.

Conventional mattresses also harbor dust mites which can trigger allergic responses such as nasal congestion, headaches, and asthma attacks. Organic latex and organic wool are naturally hypoallergenic and resist the growth of dust mites.

To feel the organic difference for yourself, call us at 703.481.4400 to schedule your appointment.

*We also offer complete organic bedding sets including bed and body pillows, comforters, and mattress toppers.*

**RECHARGE WELLNESS®**  
*Not your average treatment.*
